

CASE STUDY

FIT KIDZ CHILDCARE CENTRE PUTNEY

‘Learning at its best’

Fit Kidz Learning Centre Putney is a family operated company offering the highest quality of care and learning for children. Having excellent facilities indoors and outdoors, including bike tracks, water play, wet and dry creeks, a veggie patch and synthetic playgrounds, Fit Kidz is a purpose built centre that accommodates over 50 children. The Centre recognised the importance of distinct learning environments and requirements for the range of age groups. Each group has their own distinct playroom with specific resources and large terrains of space to enhance learning that fosters interactive activities and well-being. This includes the “Cheeky Monkeys” group of toddlers and the “Leaping Leopards” group of pre-schoolers.

Project:

Fit Kidz Childcare Centre, Putney

Designer: Innova Design Pty Ltd

Product: Flexo® Rubber – Textures, Intelli Tiles – Vivid

Project Brief:

Create a fun, creative and interactive environment for the children and their parents. Differentiate the two age group rooms whilst featuring colour themes and logo designs. Products need to be durable, long-lasting in colour and child-safe. The two playrooms particularly need to incorporate both resilient and carpeted areas to define the quiet and play areas.

Project Challenges:

Creating feature circles and curves using resilient and carpet tiles in the two playrooms. The choice of using fun, bright and light colours which are durable to high foot traffic. The flow between each room.

Sustainability requirements:

Durable and recycle materials must be used.

Why Signature Floorcoverings:

Fast lead-time, affordable budget. Colour variety.

Flexo Rubber can be waterjet cut to create logos.

Client Feedback:

The client was pleased with the end result, especially the curves and circle cut-outs of the logo using water jet cut. There have been many favourable comments from staff and clients alike.
