

‘Practicing What They Preach’

Habitat 1 is a full service design and construct company comprising of architects, interior designers and a builder. Founded in 2004 by Christian Formby and Milos Stojasavljevic, Habitat 1 was initially established as a commercial interior design firm. Their company has now evolved into a national, multi-faceted design and construction company whose works include all aspects of commercial office fitouts and multi-storey residential architecture. Habitat 1 has more than tripled in size since its inception, hence the reason for moving offices, they had outgrown their previous space and their needs had changed.

Project: Habitat 1

Designer: Habitat 1

Product: Friendly Tiles - Wind & Earth

Project Brief:

The designers at Habitat 1 wanted to create a showroom environment by using various products and materials to showcase what could be achieved when creating a functional realistic workplace. It was important to create a comfortable and friendly working environment for their staff and clients to enjoy.

Project Challenges:

As their firm had tripled in size in a very short time, a new office had to be found and refurbished in a very quick timeframe.

Sustainability Requirements:

There were a lot of natural materials used in the refurbishment. They wanted natural light and ventilation to create a healthy work environment.

Why Signature Floorconcepts:

Signature carpet tiles were selected because the colours that are available were easily coordinated with other finishes. The tiles were readily available in the Melbourne warehouse. They had always received exceptional customer service from Signature's Commercial Representative, which was a positive when making the final selection.

Client Feedback:

There have been many favourable comments from staff and clients alike. All the staff and management are extremely happy with the end result and would not change thing.
