Cut pile carpets, particularly 'plush pile' will in some circumstances exhibit the condition known as 'shading, watermarking or pile reversal'. A cut pile carpet that has 'shaded' will show areas lighter or darker than the surrounding carpet pile. The variation is caused by the reflection of light from pile tufts which come to lay in different directions. It does not affect the wear or durability of the carpet and since it is beyond the control of the manufacturer, it is not recognised as a manufacturing flaw or fault.

Terms & Conditions: Specifications are subject to manufacturing tolerances and may be changed without prior notice. Dye lots may vary in colour from sample and between production lots. All product purchases are subject to Signature Floorcoverings Standard Terms & Conditions of Sale. This product is to be installed by an experienced installer.
